

A woman with long brown hair in a ponytail, wearing an orange sweater and light blue pants, is standing in profile and using an ATM. The ATM is orange and black, with the word "ATM" in glowing orange letters above the screen. The background is a blurred indoor setting.

ATM

ATMs

Manage your ATMs network from
a single platform.

Optimize costs, maximize uptime,
and improve the user experience.

A woman in a white lab coat and glasses is using an ATM. The background is a light, modern interior with large windows. The text is overlaid on the left side of the image.

ATMs

From terminal management to cash handling and integration with banking systems, we deliver a world-class solution for ATM processing and management, with comprehensive capabilities to ensure reliable, continuous operations.

ATMs

ATMs

A solution that makes a difference

Integration with global networks

The ATH network connects ATMs to Visa, Mastercard, and American Express, ensuring a broad acceptance, secure transactions, and a unified experience.

30+ out-of-the-box transactions

Withdrawals, deposits, bill payments, transfers, and balance inquiries, delivering high performance and strong usability for end users.

Advantages that strengthen your business

Settlement, clearing, and chargebacks

Accurate reconciliation and reliable reporting to reduce rework.

Real-time monitoring

Continuous visibility into the network's operational status.

Cash management and replenishment

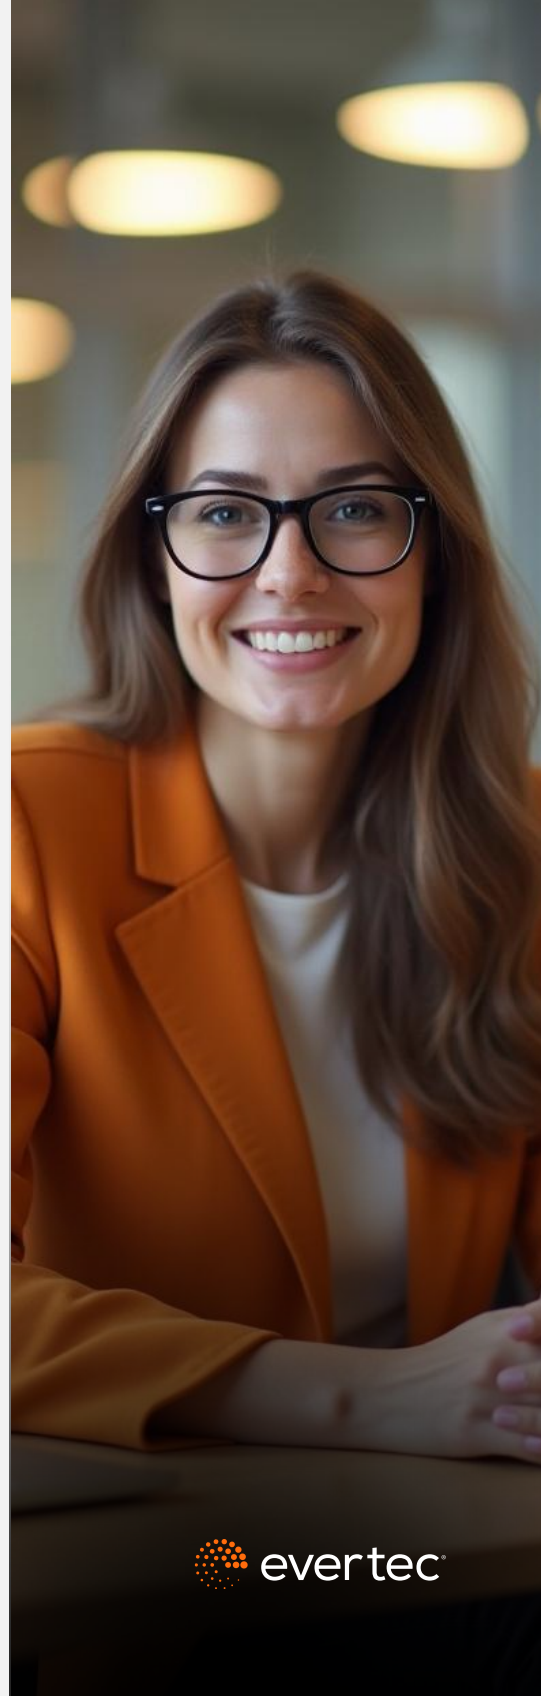

Optimized logistics with forecasts based on real usage patterns.

Integrated security and regulatory compliance

Robust authentication, data encryption, and compliance with PCI-DSS, ISO standards, and local regulations.

ATMs

ATM ecosystem

Technical sheet

Driving

Responsible for connecting, enabling, and managing ATM interaction with the transaction switch, acting as the front end to integrate different ATM models and Brands worldwide.

→ Features

- Support for Diebold, NCR, Wincor, Hyosung, and GRG ATMs
- NDC, DDC, Vista protocols
- Secure connectivity: dedicated channel, TLS, private LAN, or VPN
- Cryptographic key management (remote RKL and manual)
- Cash recycling and multi-currency capability

→ Benefits

- Interconnection with multiple networks and protocols (NDC, DDC, Vista, NS, ISO, B24)
- Centralized integration on a single platform
- PCI certification

Ficha técnica

Switching

Processes ON-US, domestic, and NOT-ON-US transactions, including network connectivity and the corresponding back-office processes.

→ Features:

- Connectivity with Visa, Mastercard, and American Express
- 30+ out-of-the-box transactions
- Settlement and clearing
- Automated settlement
- Proprietary and network reporting
- Claims and chargebacks management
- Cryptographic and PIN validations (Stand-In)
- Dynamic Currency Conversion (DCC)

→ Benefits

- Routes all transactions efficiently to card networks or local authorizers
- High-availability architecture, active-active, across geographically distributed sites
- Supports cash-in, cash-out, and administrative transactions

Ficha técnica

Availability management

Continuous monitoring of the ATM network to ensure stable, controlled operations.

→ Features

- End-to-end terminal management
- Monthly operational and transaction reports
- Access to monitoring and analytics tools
- Specialized help desk and dedicated infrastructure

→ Benefits

- Continuous visibility of events and links
- ATM financial balancing
- Cash replenishment forecasting

Technical sheet

ATM360 Management Portal

→ Features

- ATM onboarding, changes, relocations, and removals
- Near real-time transaction visibility
- Up to 13 months of historical data
- User and permission configuration (RBAC)
- Cryptographic key management
- Transaction report generation

→ Modules

- Configuration
- Users and permissions
- ATM management
- Transaction viewer
- Security Key Management

→ Benefits

- Near real-time: clear transaction visibility
- Operational resource optimization
- Data-driven, informed decision-making
- Transaction analysis with filter-based reporting

Technical sheet

Hardening and security

Comprehensive ATM security coverage, both physical and logical.

→ Features:

- Timely identification of patches and vulnerabilities
- Security configuration management
- Access, password, and port controls
- Antivirus status monitoring

→ Benefits

- Timely vulnerability remediation
- Remote software updates
- Consistent implementation of security controls

Technical sheet

→ Ongoing compliance with security policies and international regulations, effectively focused on:

- Continuous assesment
- Real-time deviation detection
- Comprehensive analysis and reporting
- Device monitoring

→ Timely vulnerability detection:

- PCI compliance
- Patch application

Technical sheet

DCC (Dynamic currency conversion) – ATH Network*

A solution that enables international cardholders to withdraw cash with advance conversion to their home currency.

→ Benefits for acquiring banks:

- New revenue stream (120+ currencies)
- Low implementation costs
- Reduced FX – related claims

→ Benefits for cardholders:

- Transparency on the final amount
- Competitive exchange rates
- No additional fees
- Easier expense planning

*Available in Costa Rica. Other countries require certification during implementation.
