

Acquiring Processing

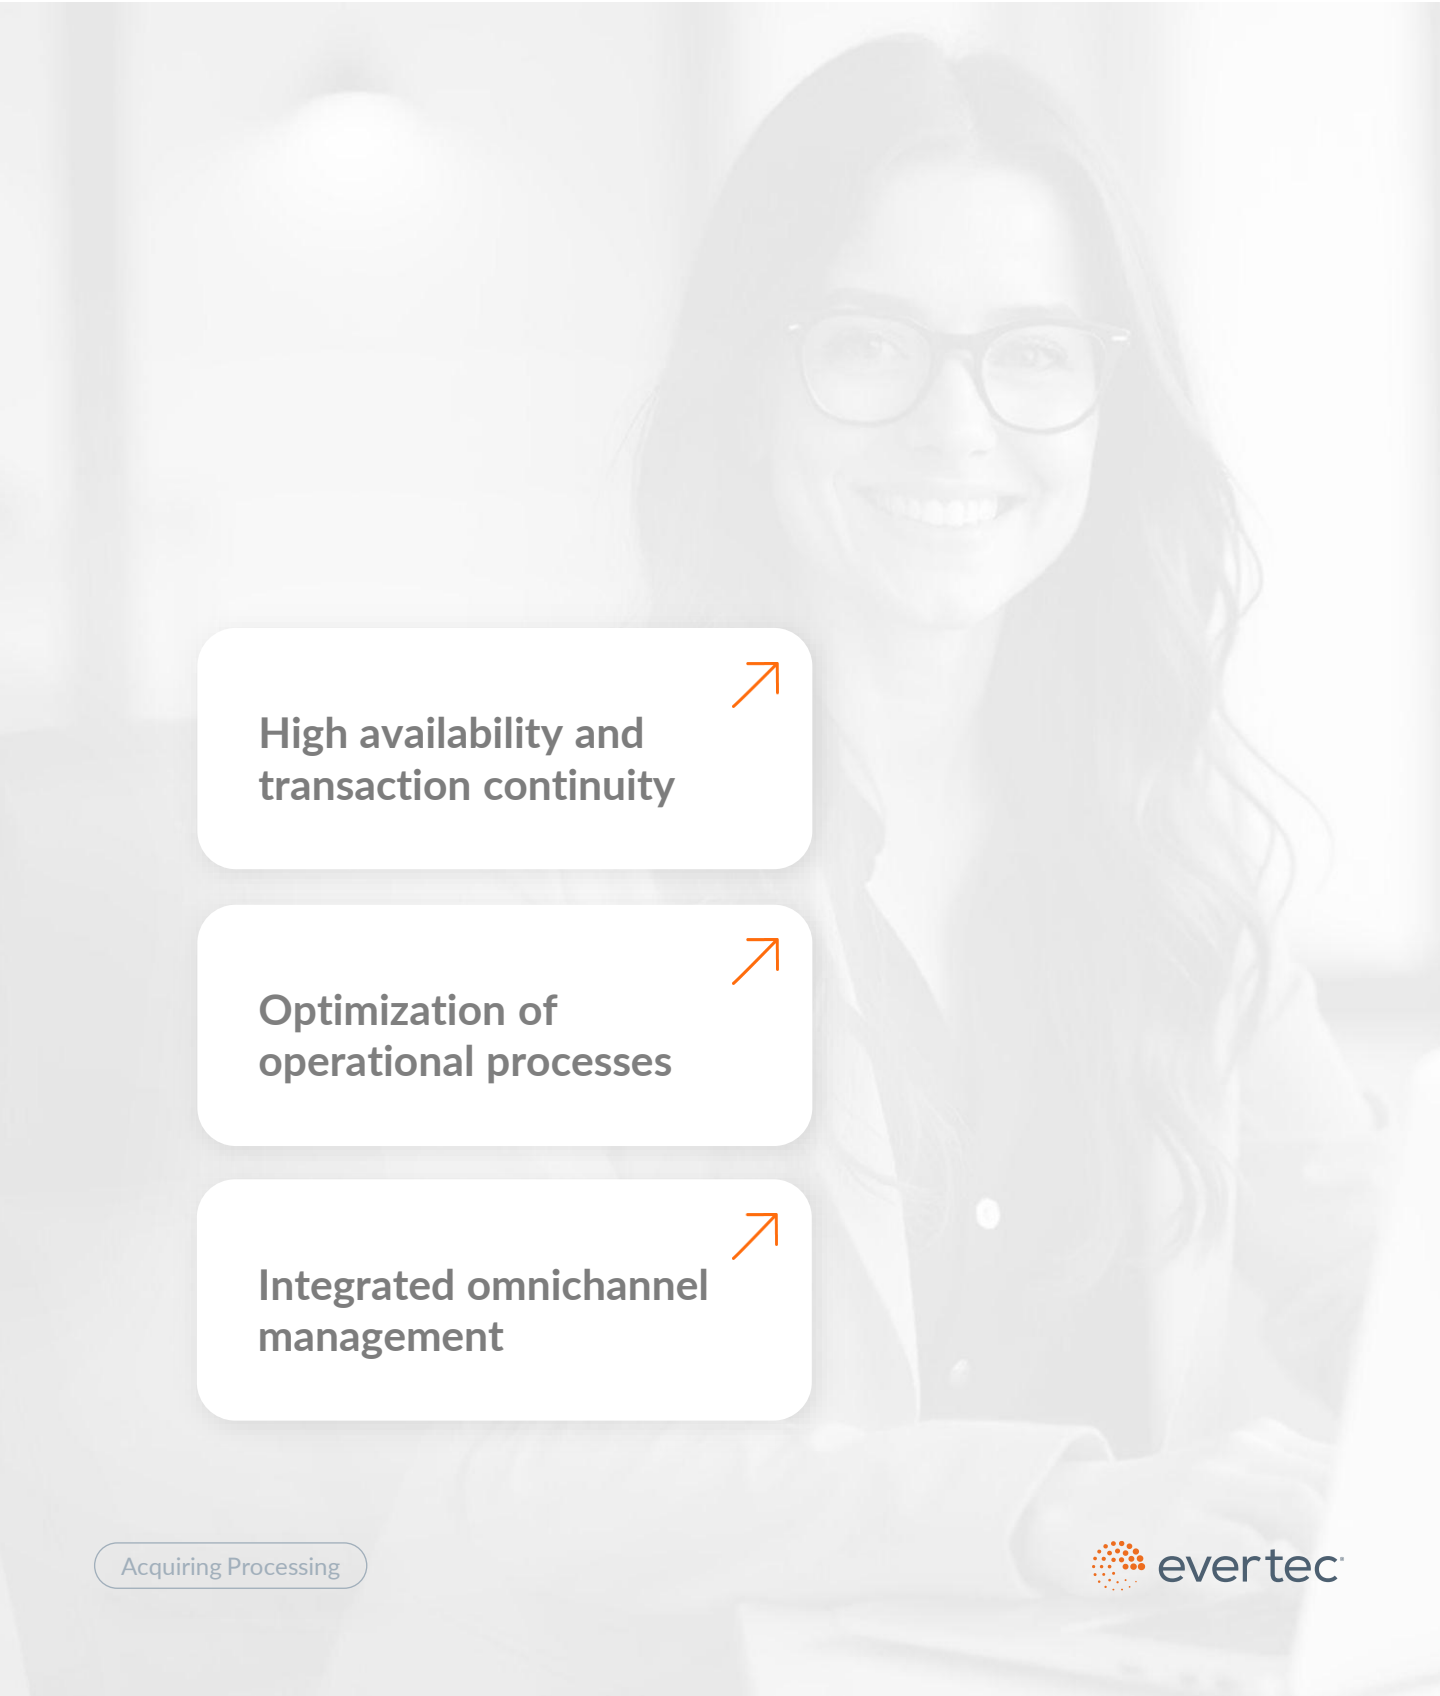

A comprehensive platform to accelerate and scale your acquiring business, enhancing the merchant experience and improving end-to-end operational efficiency.

Acquiring Processing

Technology and operational services that enable you to onboard, manage, and process electronic transactions carried out by affiliated merchants, both at physical points of sale and across digital channels.

This processing includes the capture, authorization, routing, and settlement of card payments, ensuring secure, efficient transactions aligned with network rules. It also facilitates integration with new technologies and security standards to deliver a fast and protected payment experience.

**High availability and
transaction continuity**

**Optimization of
operational processes**

**Integrated omnichannel
management**

A solution that makes a difference

- ✓ **Manages merchants** and commercial conditions from a centralized back-office platform.
- ✓ **Enables physical and digital merchants** to accept multiple payment methods.
