

RC360

Intelligence that protects your
operations in real time.

Monitors, detects and manages
fraud with a 360° view.

evertecinc.com

RC360

Prevents, detects, and manages fraud from a single platform.

Combines advanced analytics, real-time operations, and AI to improve decision-making and continuously protect your operations.

RC360

Full control in real time

Adapts rules and workflows to your operations

Operates in real time for immediate action

Leverages AI for faster, more agile decision-making

A solution that makes the difference

- ✓ Detects fraud using rules, analytics, and AI
- ✓ Monitors and responds in real time
- ✓ Ensures continuity with high availability
- ✓ Meets standards and protects sensitive data
- ✓ Integrates quickly and optimizes operational costs

RC360

Advantages that strengthen your operations

- ✓ Enables real-time decision-making without delays
- ✓ Identifies points of compromise early
- ✓ Reduces friction without compromising security
- ✓ Optimizes decisions with an intelligent engine
- ✓ Enhances fraud prevention with advanced data
- ✓ Operates with expert support and continuous monitoring

RC360

**Where our innovation
takes place**

- Argentina
- Chile
- Colombia
- Costa Rica
- Mexico
- Panama
- Puerto Rico
- Uruguay

**We serve banks, financial institutions,
cooperatives, and merchants.**

How RC360 works

Protect your customers. Act on fraud. Stay compliant with confidence

- Monitor events with easy-to-configure rules
- Detect and respond to threats using AI
- Ensure compliance without operational friction
- Block compromised cards and devices
- Make decisions with complete real-time data
- Analyze events with advanced tools
- Operate with expert 24/7 monitoring
- Identify suspicious devices

Detect fraud before it impacts your business

- Point of Compromise (POC) detection: identifies compromised cards early.
- Manages and mitigates fraud incidents efficiently.
- Integrates association data for proactive fraud management.
- Identifies and streamlines cash replacement and mitigation processes.

Intelligence that improves every decision

- Real-time risk scores generated instantly.
- AI-powered rule recommendations to enhance your fraud prevention strategies.
- Build and deploy custom models tailored to your operations.
- Consortium models leveraging industry data for stronger insights.

Optimize your origination with intelligent decision-making

- Automates and streamlines the customer onboarding process.
- Delivers more precise profiles to engage and segment your customers.
- Implements advanced credit scoring models for accurate risk assesment.
- Recommends the best products for improved customer segmentation.
- Applies conditional logic to approvals for better risk management.
- Validates external data in real time.

Turn data into actionable decisions

- Access reporting to identify trends.
- Extract and analyze data with ease.
- Centralize information in a data lake.
- Integrate with APIs and external tools.

Transform your data into practical insights

- Prevent fraud across payments and digital channels.
- Monitor events in real time.
- Manage disputes and reduce losses.
- Protect your operations with 24/7 monitoring.

RC360 applications

Ecommerce

- Protects payments with authentication and device fingerprinting
- Analyzes behavior in real time

Banking operations

- Enhances risk-based authentication
- Operates with an omnichannel approach
- Geolocation, MFA, and device fingerprinting

Credit análisis

- Evaluates risk using internal and external data
- Improves credit decision-making
- Powered by AI

Financial technology that empowers your business
