

Banking correspondents

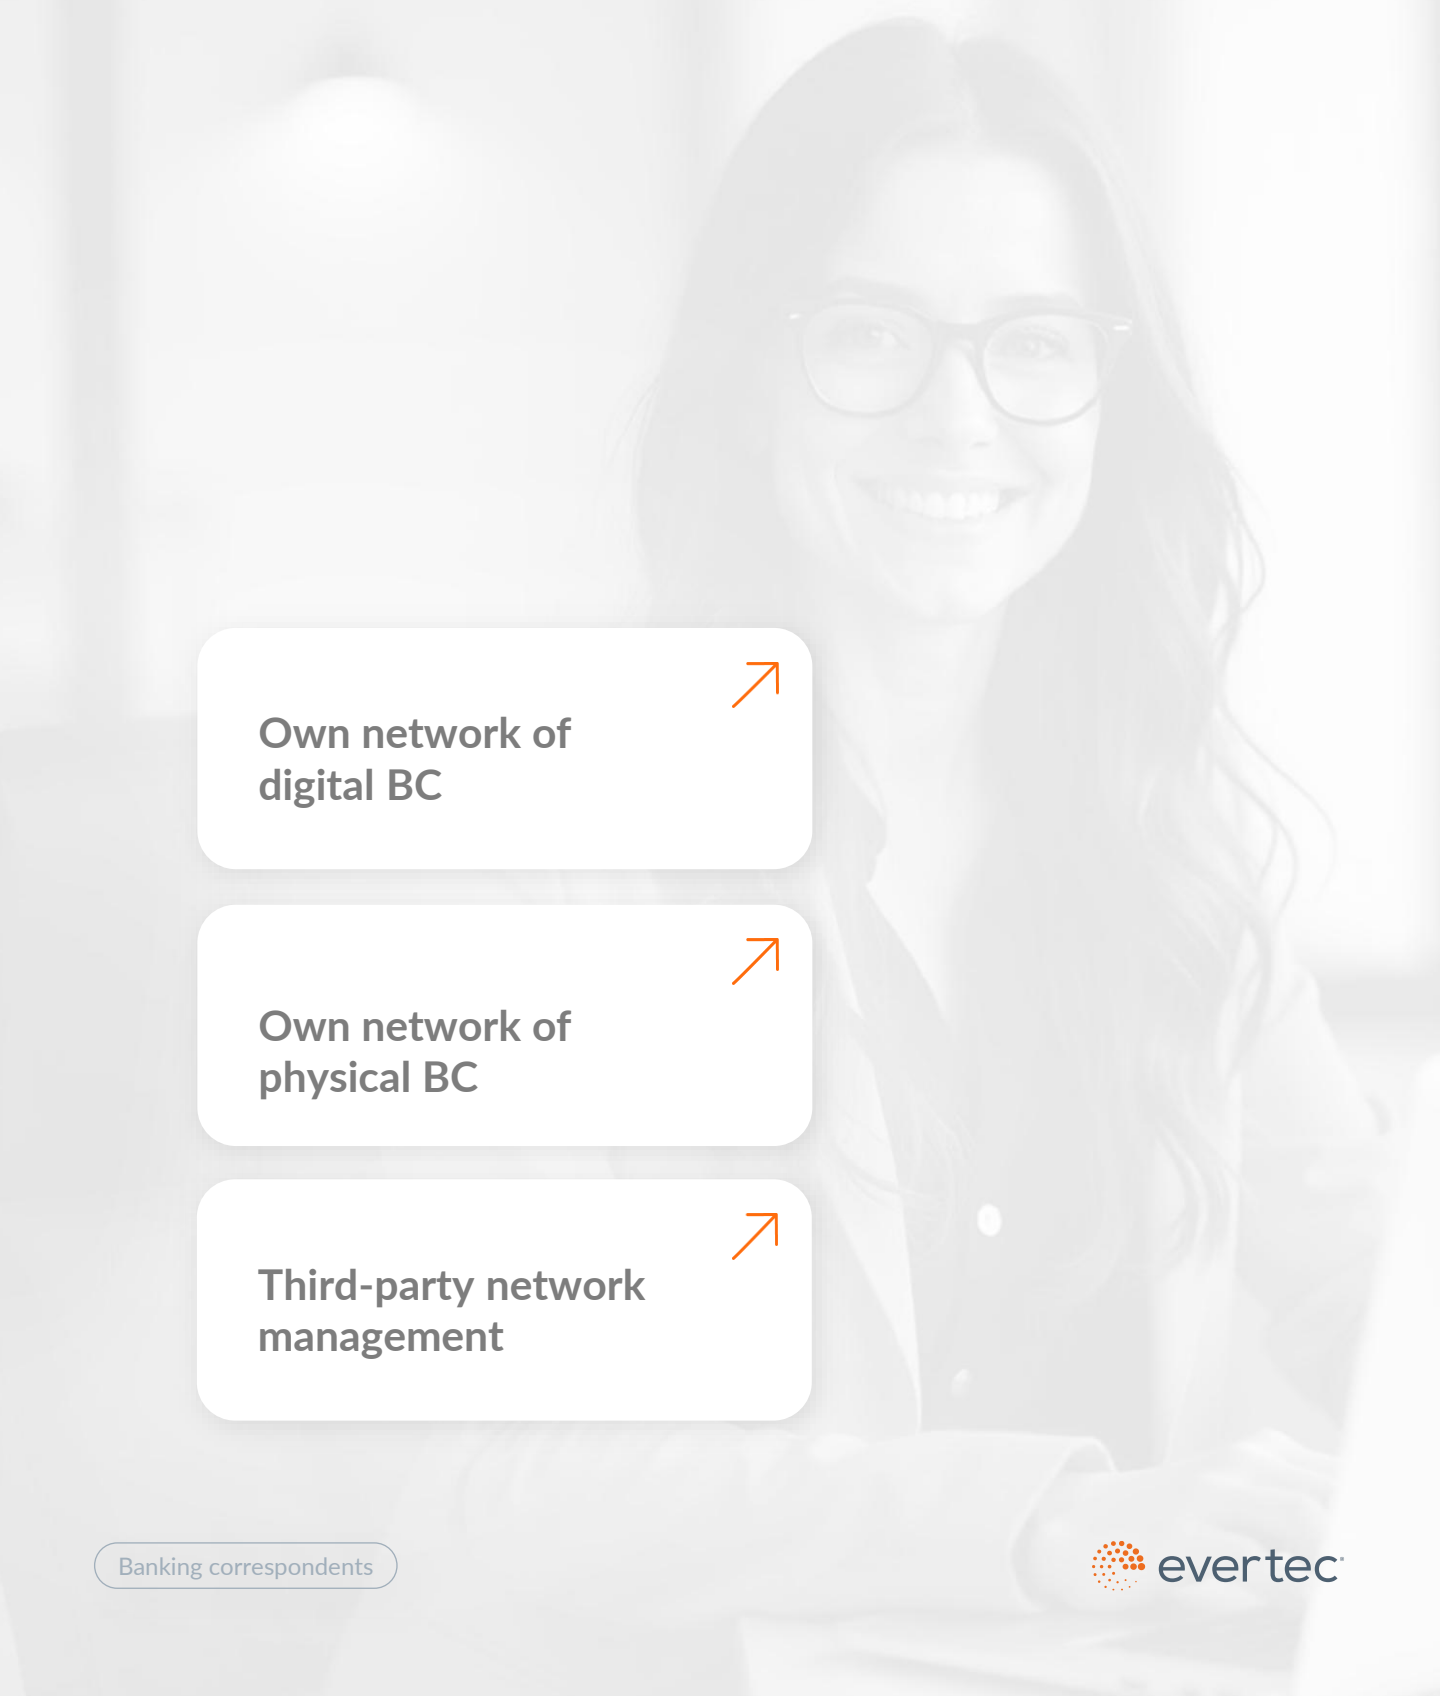

Expan your institution's reach without the need for a physical branch, promoting financial inclusión and enabling access to services through an agile, secure, and, always-available network.

Banking correspondents

Technology solution that enables you to expand your territorial presence and strengthen your relationship with your customers.

By integrating networks of partner merchants, you can be present wherever the user needs you, reducing geographic barriers and expanding access to financial services.

physical BC**

**Third-party network
management**

Banking correspondents

Service that enables network management

- ✓ **Own network of digital banking correspondents:** provides an Android and iOS application, white-labeled and customizable to match the bank's brand identity.
- ✓ **Own network of physical banking correspondents:** supplies a correspondent kit including POS device, connectivity, and on-site installation.
- ✓ **Third-party network management:** enables integration with third-party networks through APIs, reducing implementation time and effort.

Banking correspondents

Centralize network management through a correspondent portal managed directly by your institution.

Configure business rules according to your needs.

Incorporate different types of transactions, including traditional ones, and integrate your institution's various systems to enable new services within the correspondent network.

Benefits:

- Financial inclusion and greater network reach
- Expanded service coverage and territorial presence
- Integration of multiple networks into a single platform
- Access to a wide range of financial products
- Increased sales driven by higher foot traffic
- Access to innovation and technology
