

DCC

(Dynamic Currency Conversion)

It is a service that allows international cardholders to withdraw cash from ATMs in their own currency.

DCC

(Dynamic Currency Conversion)

ATM withdrawals with direct conversion to the cardholder's currency.

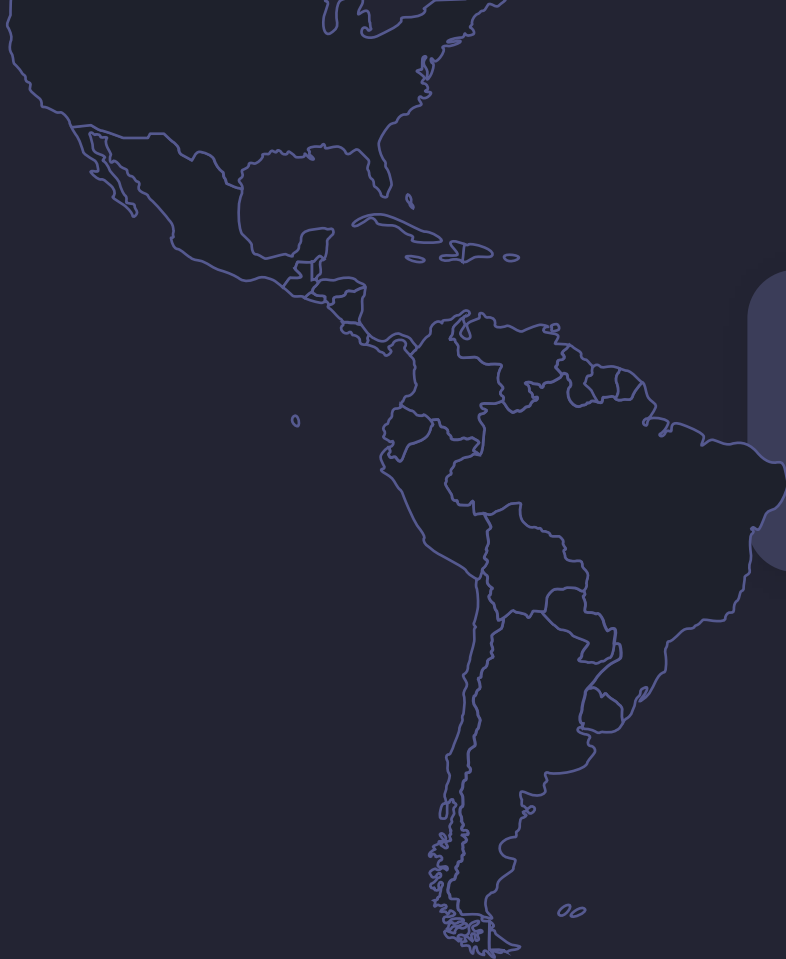

A service that allows international cardholders to withdraw cash from ATMs and view the amount in their own currency from the very beginning.

A solution that makes a difference

- ✓ Fixed and transparent exchange rate at the time of the transaction, allowing the cardholder to decide whether to accept it
- ✓ Clear display of the equivalent amount in the local currency, improving understanding and control of spending
- ✓ Direct processing in the customer's currency, often avoiding additional charges from the issuing bank
- ✓ A clearer and more user-friendly experience, especially relevant in tourist environments
