

Smart Switch

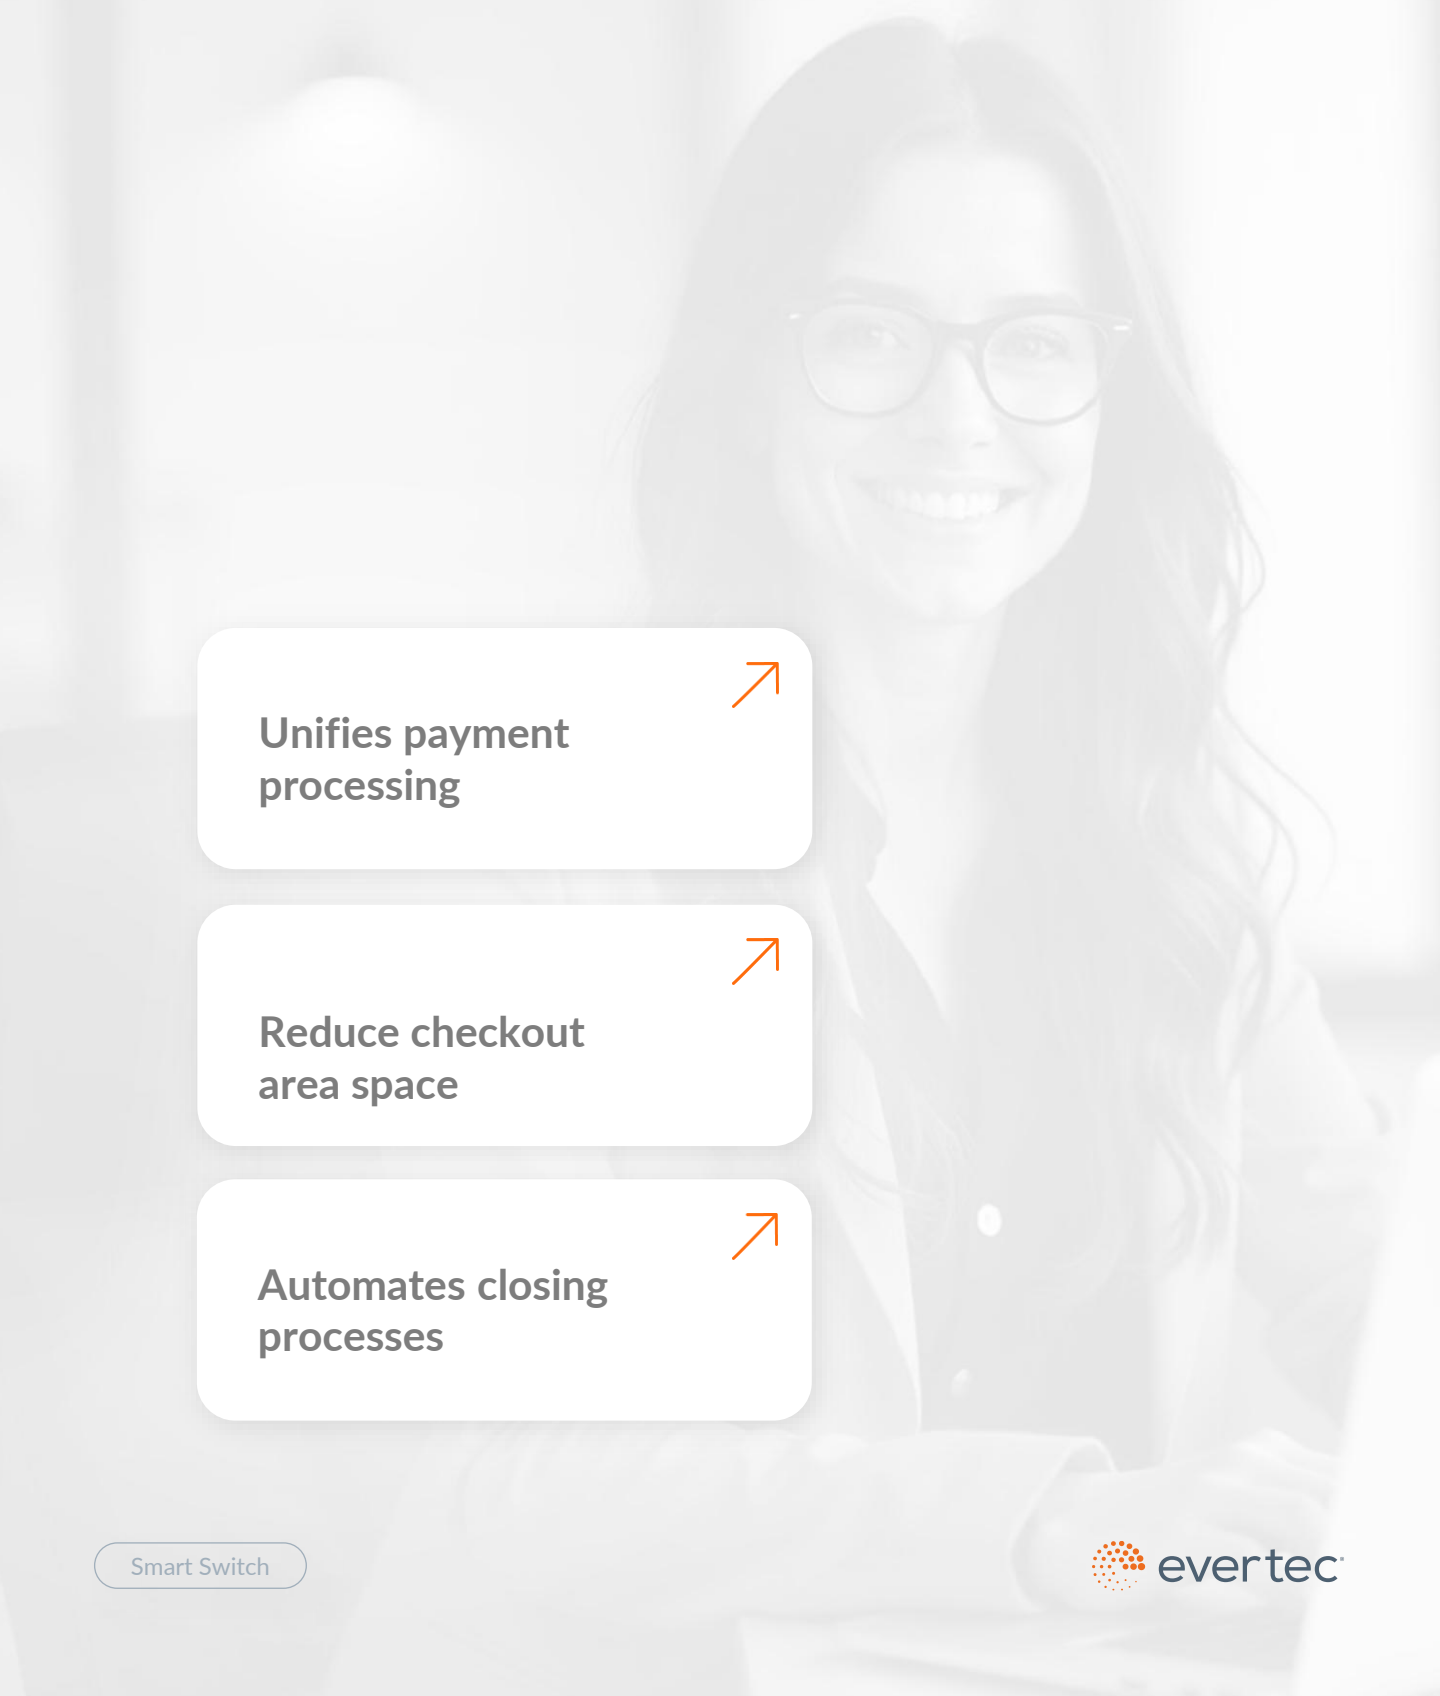

Redirects transactions from
different issuers to the designated
processors or acquirers.

Smart Switch

Centralizes payment management into a single point, eliminates the need for additional devices at the checkout, and streamlines automated closing processes.

It enables merchants to achieve greater operational efficiency, save space, reduce technological complexity, and maintain better control over their acquiring ecosystem, ensuring continuity, flexibility, and a seamless payment experience for their customers.

**Unifies payment
processing**

**Reduce checkout
area space**

**Automates closing
processes**

Smart Switch

A solution that makes a difference

- ✓ **Processes multiple card types** on a single terminal
- ✓ **Eliminates the need for** additional devices
- ✓ **Distributes transactions** based on defined rules
- ✓ **Routes transactions to multiple acquirers** or proprietary systems
- ✓ **Reduces costs associated** with comissions and POS rental
- ✓ **Reduces checkout** waiting lines
- ✓ **Meets industry security** standards
