

Microsite

Improve payment collection
with a simple and seamless
digital experience.

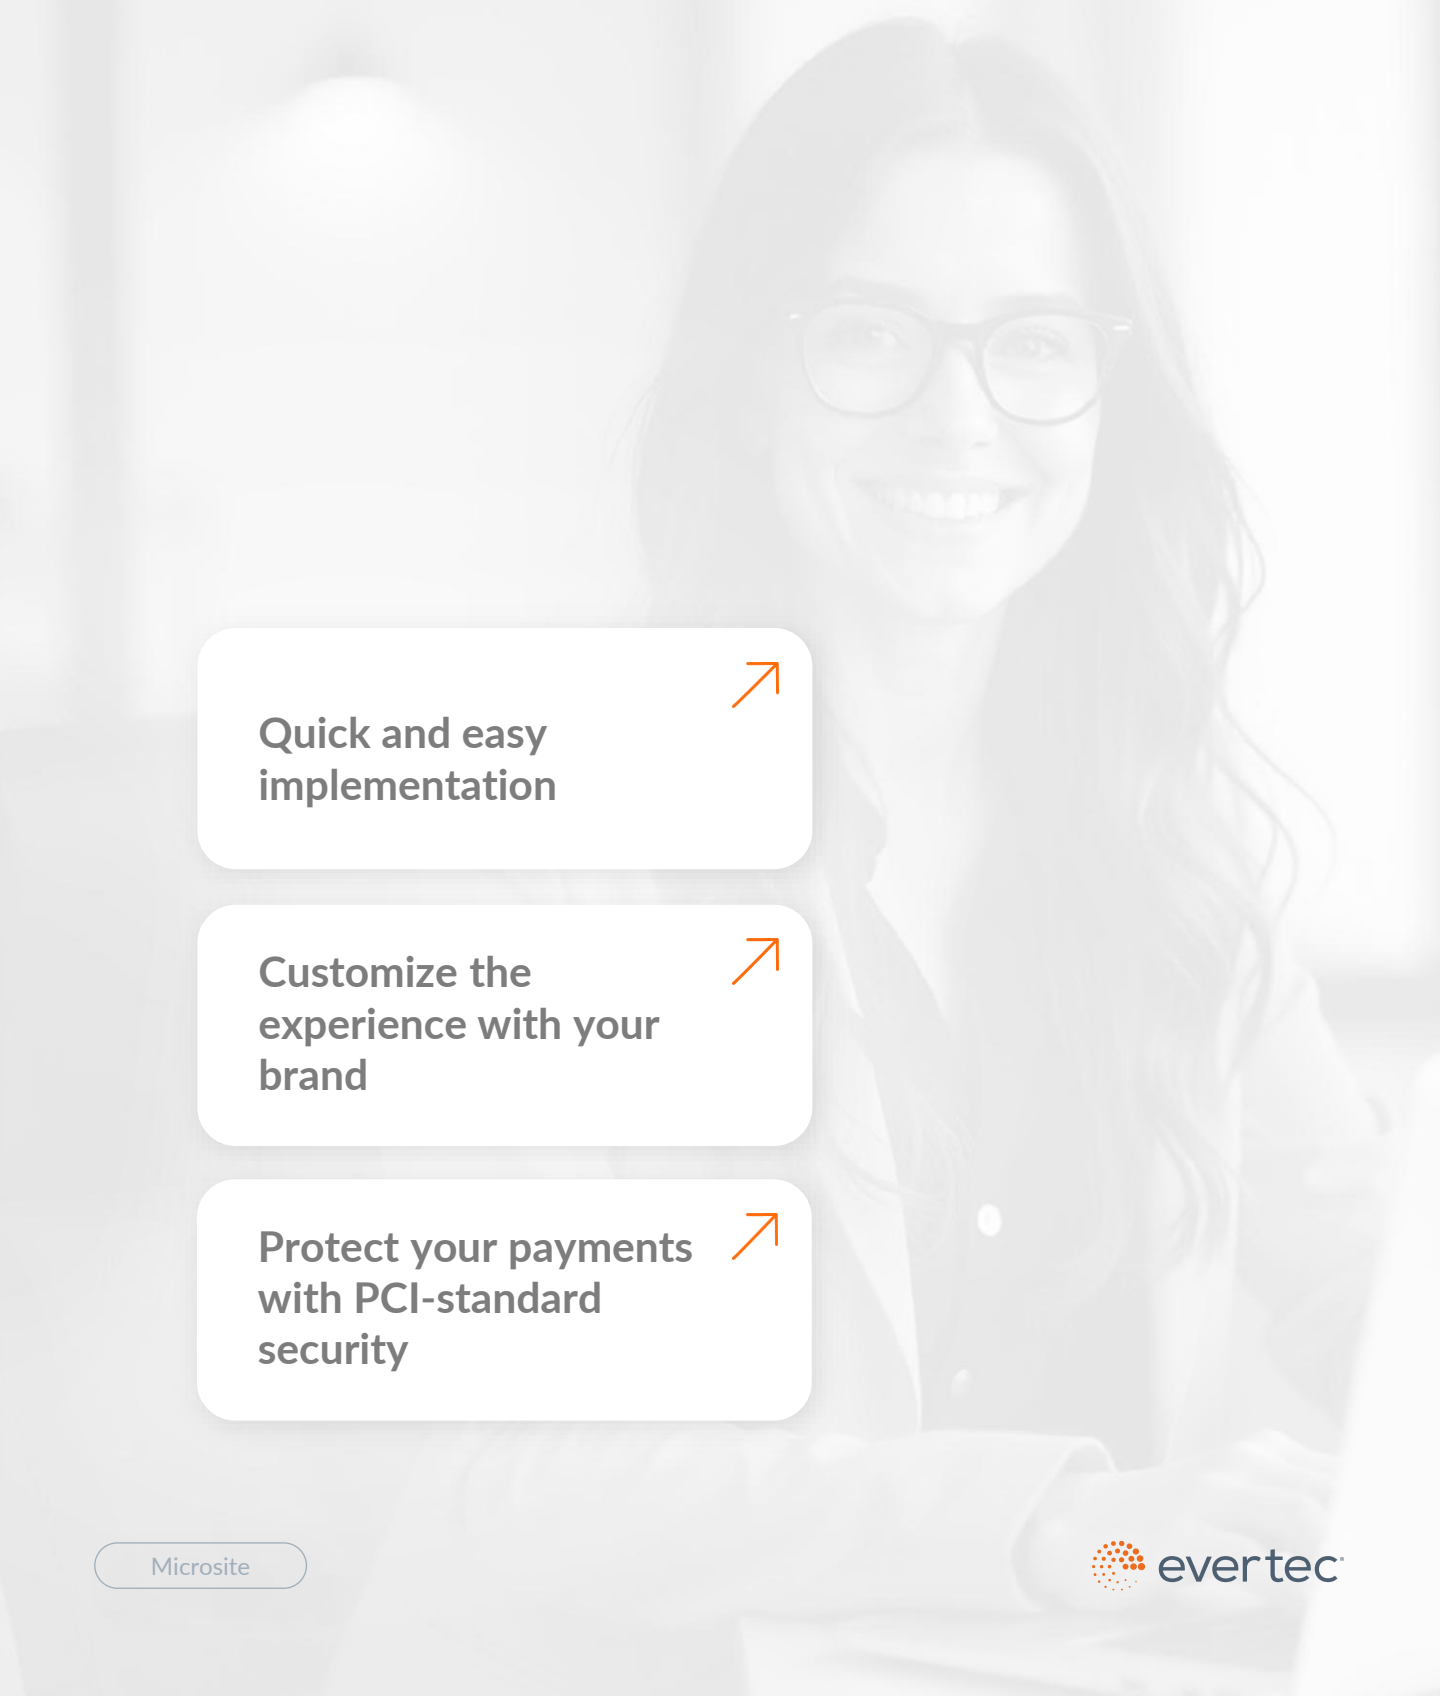

• Microsite

A platform designed for businesses that don't have a website.

It enables profesional online selling and payment collection, within a secure environment aligned with your brand.

Microsite

**Quick and easy
implementation**

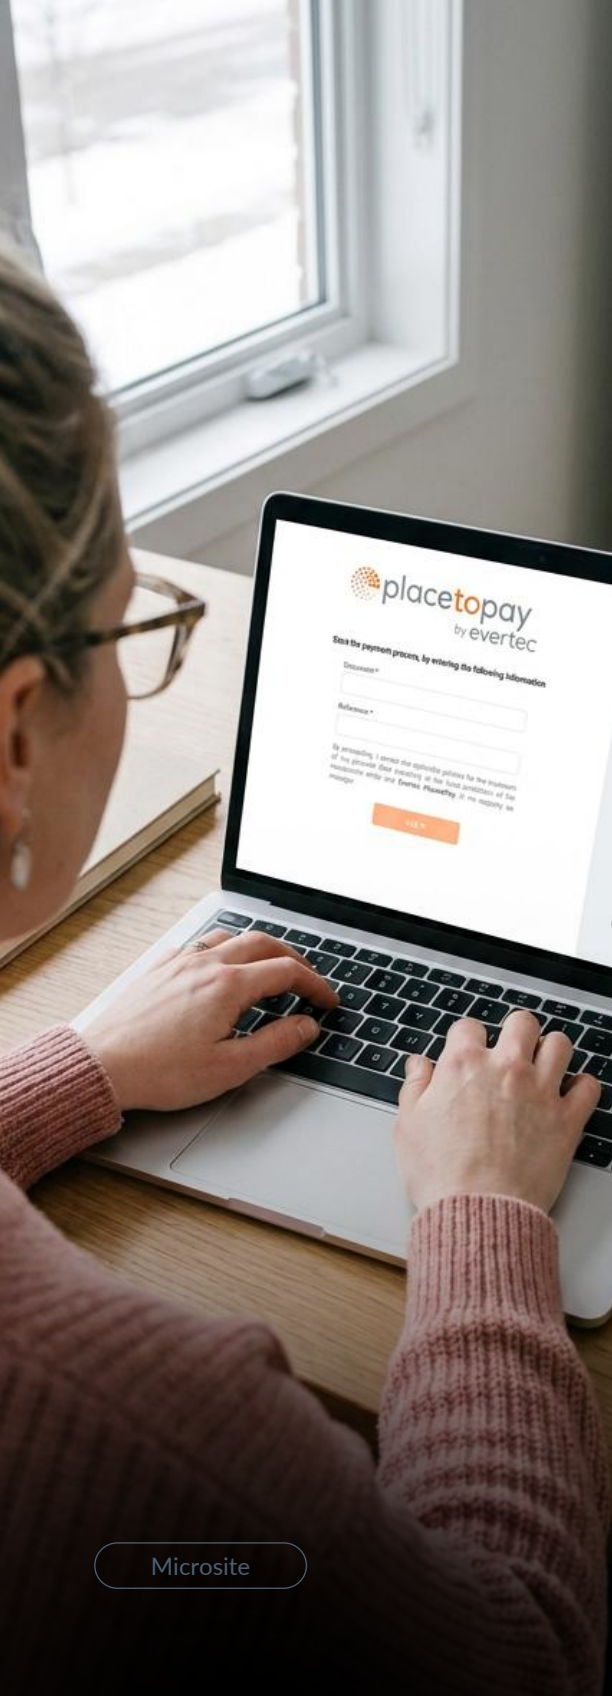

**Customize the
experience with your
brand**

**Protect your payments
with PCI-standard
security**

Microsite

A solution that makes a difference

- ✓ Activate digital payments without complex technical development.
- ✓ Use a **closed model**, where you control the data and amounts, or an open model, where the user enters the amount to be paid.
- ✓ Protect transactions **with PCI, 3D Secure, and secure storage of credentials** for future purchases.
- ✓ Manage operations through a **console to view transactions in real time**.
- ✓ Features a responsive design that allows payments from multiple devices.

Microsite

Benefits that strengthen your business

- ✓ **Accept local and international cards** to expand market reach and transaction capacity.
- ✓ **Send automatic email confirmations** to your business and users.
- ✓ **Upload data via flat files, forms, or APIs** to improve high-volumen processing.
- ✓ **Automate the payment collection** and validation cycle, significantly reducing administrative workload.
- ✓ **Receive payments at any time**, with no business-hour restrictions.

Microsite

 evertec

Why choose our solution?

- ✓ **Eliminate server and development costs** with a ready-to-deploy solution.
- ✓ **Manage refunds and cancellations** directly from an administrative console.
- ✓ **Increase recurring sales** through secure data storage for faster payments, improving conversion rates.
