

PAU

Payment Account Updater
Smarter authorizations,
better-protected merchants.

• PAU

Payment Account Updater is a value-added service for acquirers that keeps card information stored by merchants and payment platforms up to date.

By reducing declines caused by expired or updated data, it improves approval rates and the continuity of recurring transactions, protecting merchant revenue with no friction for the end customer.

**Ensures continuity in
recurring payments**

**Reduces declines due to
expired cards**

Boosts approval rates

**Safeguards merchant
revenue**

Benefits that strengthen your business

- ✓ **Omnichannel capabilities:** manage and centralize all your company's communication channels in a single platform.
- ✓ **Full control:** view all actions taken by your customers and employees.
- ✓ **Transparency:** manage all responses through the same platform.
- ✓ **Comprehensive analytics:** track conversation history, response times, inquiry types, and more.

Benefits that strengthen your business

Response automation and conversation management: handle many inquiries without the involvement of an operator.

Traceability: deliver more personalized service and avoid duplicate open requests thanks to a 360° view of conversations with each customer.

A solution that makes a difference

Enables end users to carry out tasks easily and quickly from a single channel:

- ✓ **Appointments:** manage agenda without the need to visit a branch.
- ✓ **Bookings:** make reservations quickly and easily.
- ✓ **Payments:** manage payments for the services enabled by the organization from the same channel.
- ✓ **Processes:** complete procedures without the need for an agent or operator.
- ✓ **Collections:** check outstanding balances 24/7 and pay directly from the same chat.
