in the food service industry**

Combine the power of an integrated restaurant POS system with all the tools your restaurant needs

Main Station

Point of Sale (POS)

- Calculates the cost of each ingredient and dish.
- Add modifiers that automatically adjust prices

Table management

- Tracks diners, service items, and average ticket size
- Splits and transfers items between checks
- Searches open and closed tabs by name, order, or last four digits of the card

Reportings and analytics

- Maximize savings with Inventory IQ
- Compare prices using historical data
- Analyze team performance with detailed metrics

Orders and payments directly at the table

Point of Sale (POS)

- Allows customers to order and pay directly from the table
- Speeds up ordering and payment processes to reduce operational costs
- Improves table turnover

Table management

- Allows customers to easily add tips
- Configures discounts, tips, and taxes

Reporting and analytics

- Sends electronic or printed receipts from the integrated printer
- Collects data for detailed analysis
- Builds a customer database and helps identify menu preferences

Mobile + Pay

Online ordering from any device

directly to your POS and your kitchen

Custom-branded mobile apps for iPhone and Android

- Manage online orders from a single platform
- Integrate your ordering system with digital rewards programs

Website ordering

- Turn interest into action with your own online ordering site
- Our experts build your website and set up your menu

Reporting and analytics

- Manage deliveries with predefined delivery zones
- Set the times when you accept deliveries

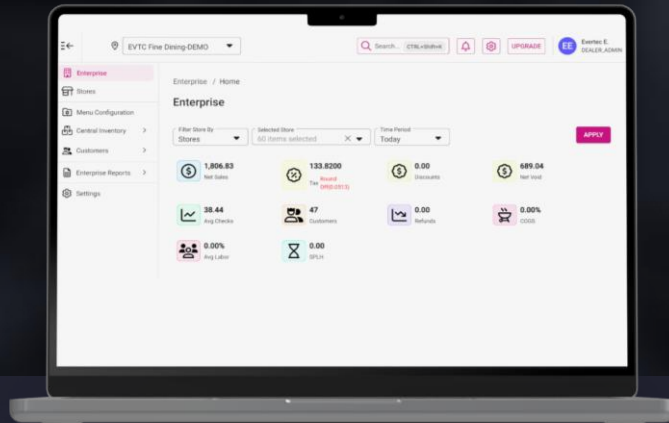

Simplified inventory management

- Receive alerts when an item reaches its minimum stock level
- Quickly log inventory data with intuitive settings
- Eliminate manual paper-based counts

Real-time and on-demand reporting

- Plan purchases with accurate, real-time data
- Track ingredient costs to identify improvement opportunities
- Automate inventory management

Real-time operational visibility

from a single administrative portal

- Customizable tools for menu configuration
- Employee management with time tracking, attendance, payroll, and monitoring
- Eliminates manual paper-based inventory counts
- Real-time and on-demand reporting for sales, deposits, and transactions

Kiosk

self-service that optimizes operations and enhances experience

- Allows customers to place and customize their orders directly on the screen, reducing wait times and improving accuracy
- Accepts multiple payment methods at the kiosk to streamline the purchasing process
- Displays menus and promotions in an intuitive design that helps increase average ticket size

Improves efficiency and customer experience

- Reduces lines and enables staff to focus on customer experience
- Ensures consistent orders with clear menu options
- Optimizes order flow by sending them directly to the POS and kitchen
