**It's like having an agile and  
efficient assistant 24/7**

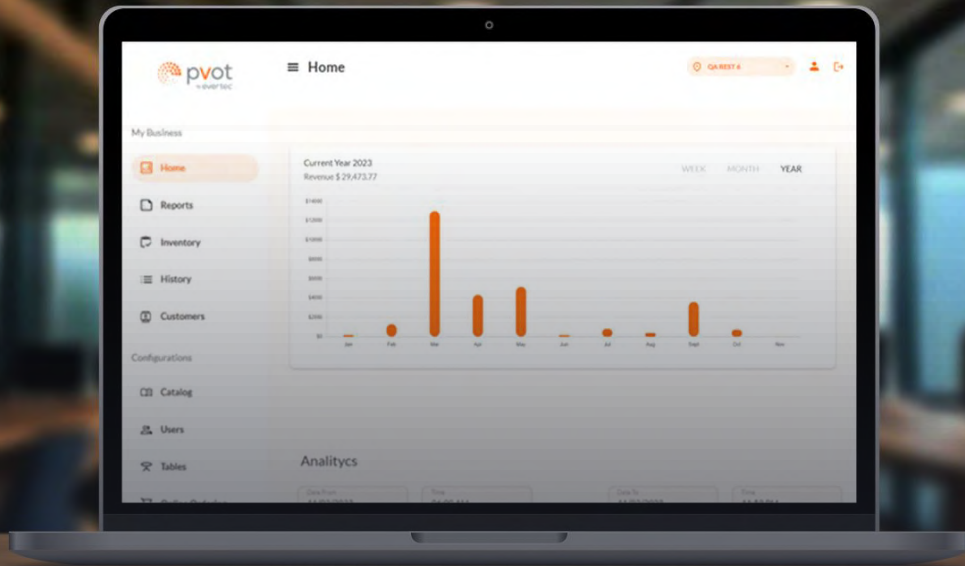

**Premium device**

**Mobile device**

Dynamic payment acceptance and business management system  
that integrates point-of-sale functionalities into a single platform

## Administrative portal

Your smart point-of-sale system also includes an administrative portal that provides a comprehensive, high-level view of transactions across the chain or by individual location, including sales, cash management, cost of goods sold, payroll, and net profit for a selected time period, whether weekly, monthly, or yearly.

# Chain management

## → View Analytics and Reports

View consolidated reports across all your locations, including sales, costs, transactions, average ticket, payroll, cash reconciliations, sales by month and by hour, refunds, discounts, voids, and cash control.

## → View order history

View all orders across your locations in a consolidated way.

## → View customers

View and download the consolidated customer list across all your locations.

## → Manage centralized product catalog

Manage a centralized product catalog that is automatically reflected across all locations, with the option for location-based variable pricing.

## → Provide access to chain users

Grant access to users who need visibility into your chain's reports and product catalog.
