

Retail Payments

Everything you need to get paid better, across all your channels. We are the only operator that processes transactions with two of the leading acquirers in the market and maintains key partnership to support your business.

A solution that makes a difference

- ✔ **Tendus (digital & QR payments):**
enable digital payments across all your channels with a single integration. Access pre-defined commercial agreements with payment methods or negotiate your rates directly.
- ✔ **Transactional Switch:**
process credit and debit card payments using multiple acquirers. Integrate proprietary authorizers, financial institutions, service payments, and loyalty programs in one place.
- ✔ **Automatic reconciliation:**
centralize and reconcile all your payments. Connect directly to your ERP and reduce manual work for your finance team.

preferred partnerships to help power your business.

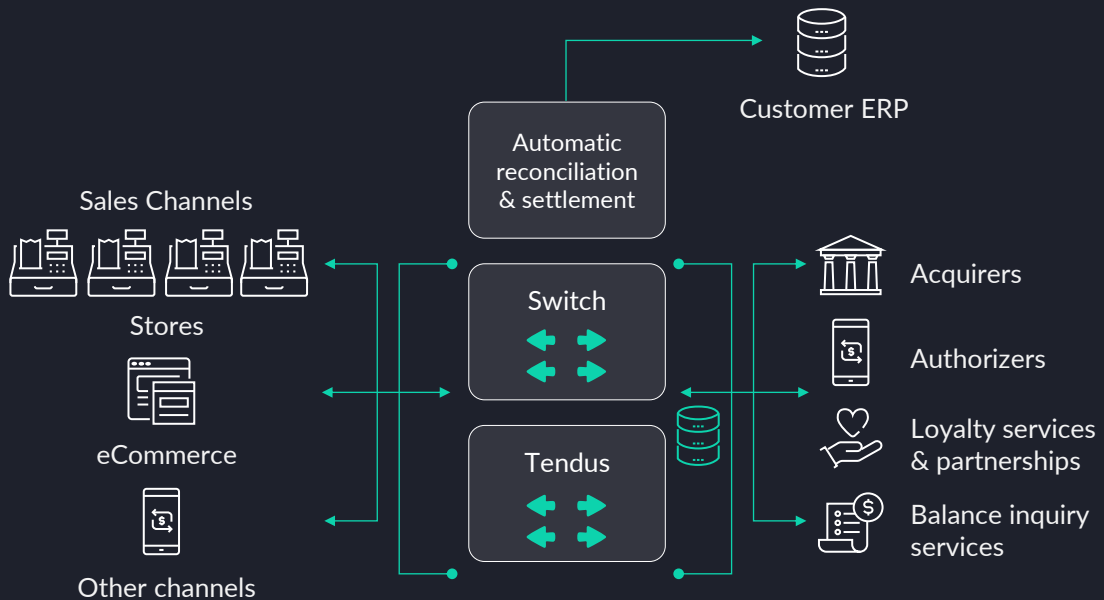

Retail Payments

 evertec

Over 25 years integrating electronic payments for retailers and financial institutions

How does the ecosystem work?

- Switch processes card payments through multiple acquirers
- Tendus manages digital and QR payments

Retail Payments brings together robust systems that process and consolidate payments from multiple sources.

It enables the management of in-store and digital payments from a single platform, connecting and routing transactions to acquirers, authorizers, and other value-added services.
